

## WIRELESS DATA LOGGERS

### **FEATURES**

- 16 Analog Single Ended or 8 Differential Channels
- 176 Parameters Logged Simultaneously
- Selectable Logging and Update rates
- Communication RS232 Serial & RS485 MODBUS RTU
- 24 bit resolution
- Low Power Consumption with Rechargeable Batteries
- Industrial Grade IP65 Sealed
- Device configuration over SMS & GUI
- Over the Air Firmware Update
- Desktop & Mobile App

### **APPLICATIONS**

- Solar Meteorological Station
- Wireless Weather Monitoring Station
- Remote Sensing
- Automatic Water Level Monitoring
- Industrial Monitoring
- Industrial Automation
- Process Monitoring
- Renewable Energy Monitoring

## ACE DLG89 4C / 8C / AC

### **DESCRIPTION**

DLG89 is a versatile precision wireless data logger from the ACE family of loggers for outdoor applications. The DLG89 logger offers 24-bit Analog to Digital conversion for analog signals. Ultrahigh resolution ADC ensures precise data capturing from micro-volt output sensors.

DLG89 data logger takes periodic measurements from a diverse set of sensors connected with it. The acquired data is processed and sent to the cloud, along with that, the data is stored in the SD card memory. The secure transmission of data to a cloud server is done using an integrated GSM modem. The logger also has a USB interface which can be connected with a laptop for data retrieval.

The logger boasts an LCD display and a keypad for easy configuration, data viewing, and health information at the site making it very easy and intuitive to use.

ACE DLG89 is available in 3 variants DLG89-4C, -8C, and -AC which refer to the available sensor input channels in the device. The DLG89-4C has 4 channels, -8C has 8 channels, and -AC has 16 channels.

## Web Portal, Desktop and Android Application

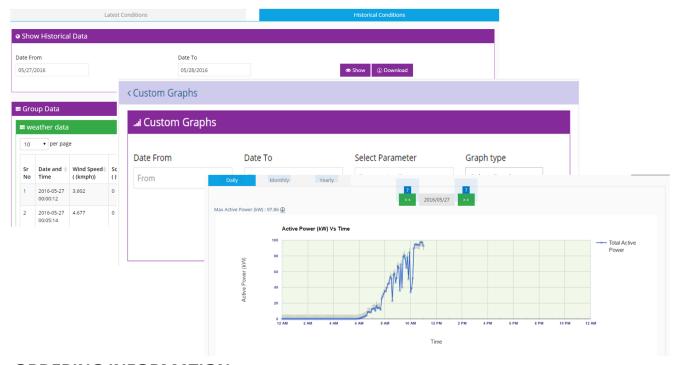

A web portal application and a user friendly Android Application is available with DLG89. Desktop application allows configuration settings and data retrieval. The Android app allows data viewing only.

Note: The Android app is available ONLY for customers who use Aeron's Web Services.
